Rohan Iyer (fictional test profile)

rohan.test@example.com | Pune

Summary

Backend engineer with 2 years building payment and notification services in Java and Node.js.

Skills

Java, Spring Boot, Node.js, TypeScript, PostgreSQL, Redis, REST APIs, Azure, Docker, Git

Experience

Software Engineer, PayLoop Fintech (fictional) (Jul 2024 - Present)

- Built a refund service in Java and Spring Boot that handles about 40,000 refunds a day
- Cut p95 latency of the payment-status API from 900 ms to 250 ms by adding Redis caching
- Moved 6 Node.js notification jobs to Azure Functions, removing 2 always-on servers
- Wrote PostgreSQL migrations and on-call runbooks; handled 30+ production incidents as part of a 5-person rotation

Projects

Expense splitter app, Side project (2023)

- Built a TypeScript and Node.js expense-splitting web app used by about 150 college friends

Education

B.E. Information Technology, Pune University (fictional record), 2024
